

LINGUISTICS WITH CLARIN PORTAL & SEARCHING FOR RESOURCES

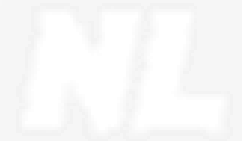

Jan Odijk

LOT Winterschool

Amsterdam, 2015-01-12

OVERVIEW

- CLARIN Portal
- Find data and tools

The letters "NL" in a bold, white, sans-serif font, centered within a light gray circular background. This circle is part of a larger, faint network diagram that spans the right side of the slide.

OVERVIEW

➤ **CLARIN Portal**

- Find data and tools

CLARIN PORTAL

- Finding data and tools via one portal?
 - EU Portal: <http://www.clarin.eu/guest-portal>
 - NL Portal under development: [sneak preview](#)
- In the meantime, for NL:
 - Use <http://www.clarin.nl/node/404>
 - for an overview of CLARIN-NL
 - Data
 - Applications
 - Services
 - Links to the CLARIN Europe data and services

CLARIN PORTAL

- CLARIN-NL Portal [sneak preview](#)
- [Intro page](#)
- [[Centres](#)] A summary of Dutch CLARIN centres
- [[Find Data](#)] A selection of tools to find relevant resources using metadata and content
- [[Services](#)] : An inventory of tools and services with faceted search
- [CLARIN recipes] to do the most often used actions.
- [Colleagues & Advice] for asking colleagues for advice

OVERVIEW

- CLARIN Portal
 - **Find data and tools**

‘CAN FIND ALL DATA AND TOOLS’

- All data are distributed over various CLARIN centres
 - How can you find them?
- Web pages and URLs change, disappear over time
 - How do we know a link is there still tomorrow?
- Searching via Google will not work
 - Too many irrelevant search results

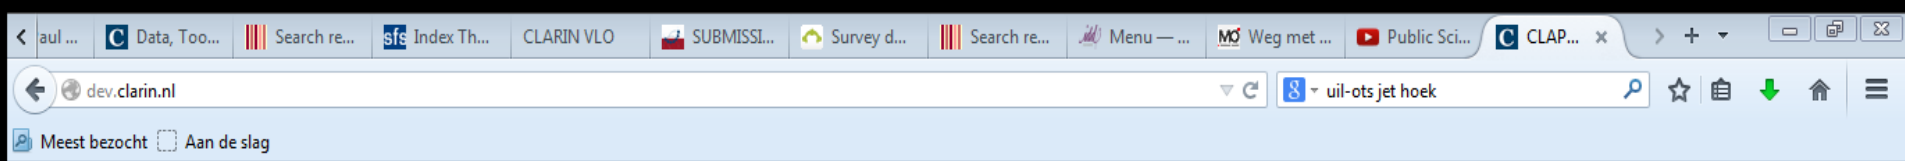

‘CAN FIND ALL DATA AND TOOLS’

- CLARIN approach:
 - For all data there must be **metadata**
 - Data that describe data (resource descriptions)
 - Metadata must all be in the same format
 - Component-based Metadata Infrastructure (**CMDI**) format
 - All data and metadata must be accessible via Persistent Identifiers (**PID**)
 - Metadata must be made available according to a specific protocol (**OAI-PMH**) by each centre
 - Some centres **harvest** the metadata of all centres and store them centrally
 - And make available browser and search engines
- More on this on Friday

'CAN FIND ALL DATA AND TOOLS'

Thanks for your Attention

CLAPOP - The CLARIN NL Portal Pages

Introduction

CLAPOP is the portal of the **Dutch CLARIN community**. It brings together all relevant resources that were created within the CLARIN NL project and that now make out part of the CLARIN NL infrastructure or that were created by other projects but are essential for the functioning of the CLARIN (NL) infrastructure.

CLAPOP offers

- An inventory of **CLARIN tools and services**, that also provides an advanced faceted search system based on several important tool and service aspects [[Services](#)]
- A summary of **Dutch CLARIN centres** [[Centres](#)]
- A selection of tools to **find relevant resources using metadata and content search** [[Search Data](#)]
- A series of pages with **recipes** to do the most often used **language data manipulation and processing** actions. [[CLARIN recipes](#)]
- A system to ask **advice from colleagues** about CLARIN tools and services issues. [[Colleagues&Advice](#)] (only available when logged in)

CLAPOP supports the CLARIN standard: a **federated login** with your own institute's account (currently only through the your CLARIN website account. Use *federated login* in the upper menu bar.

Accounts & Authentication

Logging into the CLAPOP will allow you to contact and interact with your (CLARIN) colleagues and use other CLARIN services linked to from CLAPOP without having to

Centre type:
CLARIN B centre

<u>NAME</u>	<u>CENTRE TYPE</u>	<u>RESEARCH INTERESTS</u>	<u>ABOUT</u>
Huygens ING	CLARIN B centre	historical linguistics History Literary Studies	Huygens Institute for Netherlands History aims to make the expertise of humanities researchers collaborate closely with specialists in e-Humanities. It consciously sustains traditional humaniora expertise and accommodate historians and textual scholars for all periods. It is the largest humanities research institute in the Netherlands and part of the KNAW and arose from the combination of the Huygens Institute and the Institute for the History of the Netherlands (ING).
Institute for Dutch Lexicology	CLARIN B centre	Lexicology	The Institute for Dutch lexicology (INL) collects and describes the Dutch language and its vocabulary from the 5th and 6th centuries to the present day, including all new words in the Dutch language.
Meertens Institute	CLARIN B centre	Cultural Sciences Language Documentation	The Meertens Institute is an institute of the Royal Netherlands' Academy of Arts and Sciences. It was founded in 1932 as a bureau for the documentation of Dutch dialects. In later years, Dutch ethnology and onomastics have been included in the documentative tasks of the institute. At this moment, the Meertens Institute is primarily a research institute with substantial collections in the fields of language variation, European ethnology and onomastics.
MPI for Psycholinguistics	CLARIN B centre	Language Documentation Acquisition Discourse Sign language	The Language Archive, hosted by the Max Planck Institute for Psycholinguistics (MPI), is one of the leading centres worldwide for archiving multimedia/multimodal language resources covering many linguistic data types such as multimedia annotations, multimedia lexica, grammar descriptions etc. (http://corpus1.mpi.nl).

version, a literal English translation, a number of glossed texts and linguistic comments in order to provide extensive data for future research on the development of a written language. The second major component of the project is the Teop lexical database that contains all words found in the recordings and editions, as well as independently collected words together with examples and grammatical information. The lexical database is accompanied by a gallery of photographs, drawings, and audio clips. In addition, the documentation contains a sketch grammar, an explorative study of Teop phonology, and an index. The project has been funded by the VolkswagenStiftung since September 2000.

Teop is an Oceanic language that is spoken in the north-east of the island of Bougainville, in the Tinuput District of the autonomous North Solomons Province of Papua New Guinea. It belongs to the Nehan-North Bougainville network of the North-West Solomonic Group of the Meso-Melanesian Cluster. (Ross 1988)

How the dugongs came to Asitavi: An old woman provides drinking water for her family which she gets from a secret place. As her son-in-law spies on her, she jumps into the water and becomes a dugong.
